

DRAWCODE TECHNOLOGIES

Project Proposal

Enterprise Resource Planning (ERP) System

The Marketing Quotient

Sales & Service Organization | Multi-Country | Multi-Brand | Multi-Channel

Prepared By	Drawcode Technologies	Prepared For	The Marketing Quotient
Document Version	1.0	Date	15 June 2026
Classification	Confidential		

1. Introduction

Drawcode Technologies is pleased to present this proposal for the development of a centralized Enterprise Resource Planning (ERP) platform for The Marketing Quotient. This document outlines the proposed scope, modules, features, and investment for building a fully integrated ERP system tailored to your Sales & Service Organization.

The platform will unify sales force automation, commission management, HR operations, live GPS tracking, expense control, payroll processing, and business intelligence into a single, scalable system — accessible via web and dedicated mobile application.

2. Scope of Work

The ERP system will be developed across the following core modules, each covering the functional requirements as discussed and agreed upon during the discovery phase. The platform supports multi-country, multi-brand, and multi-channel operations.

User & Access Management

- Role-Based Access Control (RBAC) with country and department-based permissions
- Menu-level, screen-level, and action-level permission configuration (View, Create, Edit, Delete, Approve, Export)
- User role assignment and management by Super Admin and Country Admin
- Location-based login enforcement configurable per employee or role

Sales Management

- End-to-end lead lifecycle management: New → Contacted → Proposal Sent → Won / Lost
- Lead sources: Road Sales, Call Center, Freelancers, Referrals, Marketing, Walk-in, Corporate, Custom
- Sales recording linked to leads with single, shared, and team sale support
- Revenue split configuration: fixed percentage, fixed amount, or multi-person split
- After-sale call recording attachment linked to sale records

Commission & Incentives

- Product-wise, brand-wise, country-wise, team-wise, and employee-wise commission rules

- Revenue slab-based commission calculation
- Automatic commission computation upon sale approval
- Shared commission distribution for multi-person sales
- Commission approval workflow with manager and finance sign-off

Expense Management

- Expense categories: Travel, Fuel, Visa, Accommodation, Food, Marketing, Office, Vehicle, Miscellaneous
- Receipt upload with amount, date, category, and notes capture
- Multi-level approval workflow: Employee → Manager → Finance
- Tracking states: Pending, Approved, Rejected, Reimbursed
- Pending reimbursement tracking per employee

Employee Management

- Employee master records with personal, employment, and contact details
- Support for employment types: Permanent, Contract, Freelancer, Consultant, Temporary
- Document storage: Passport, Visa, Labor Card, Driving License, Emirates ID, Insurance
- Document version history with full audit trail
- Employee profile management with edit history

GPS Tracking

- Live GPS coordinates, address mapping, last active time, and online/offline status
- GPS-based check-in/check-out with optional selfie verification
- Daily route history, distance travelled, visit count, working hours, idle time, and route playback
- Geofencing for office, customer sites, territories, and project locations with auto check-in/out
- Salesperson geo-fencing: assign designated territories with alerts on violations
- GPS alerts: check-in/out notifications, route deviation, GPS disabled, device offline

Payroll

- Earnings: Basic Salary, Commission, Incentives, Bonus, Allowances
- Deductions: Leave Deductions, Penalties, Loans, Other Deductions
- Monthly payroll generation with automated calculations
- Payslip generation per employee per period
- Payroll approval workflow with multi-level authorization

HR Management

- Leave types: Annual, Sick, Emergency, Unpaid — with request, approval, and balance tracking
- Leave calendar view and manager notification on approval
- Document expiry tracking for Visa, Passport, Labor Card, Driving License, Insurance
- Automated expiry notifications at 90, 60, and 30 days before expiry
- Asset management: Cars, Fuel Cards, Laptops, Mobiles, SIM Cards, and others
- Asset allocation, return tracking, and full asset history

Workflow Automation

- Configurable multi-level approval workflows for Leads, Expenses, Commissions, Payroll, Leaves, and Assets
- Conditional routing and escalation rules with configurable SLA timers
- Full audit trail for all workflow actions and decisions

Building / Product / Task Management

- Building CRUD: Building Name, Address, Security Staff, Owner, Companies/Shops with custom fields

- Buildings linked to leads, sales, and customer visits for full traceability
- Product CRUD: Name, Brand, Category, Revenue, Cost, Profit Margin (auto-calculated)
- Product catalogue with filtering by brand, category, and active/inactive status
- Task Assignment: create, assign, and track tasks across teams with priority and due dates
- Task statuses: To Do, In Progress, Completed, Overdue — with notifications and activity trail

Finance & Revenue

- Revenue reporting by product, brand, country, and team
- Net Profit Analysis: Revenue vs Expense with profitability analytics
- Brand and product profitability reports
- Expense reports by category, employee, department, and country

Reports & Analytics

- Sales reports: Leads by Source/Status, Conversion Rate, Salesperson Performance
- Finance reports: Expense, Revenue, Net Profit, Brand/Product Profitability
- HR reports: Leave Summary, Employee Roster, Document Expiry, Asset Allocation
- GPS reports: Location/Attendance, Route, Customer Visit, Productivity, Geofence Violations
- Export in Excel (.xlsx), CSV (.csv), and PDF formats

Dashboards

- Admin/Executive dashboard: Total Leads, Revenue, Expenses, Net Profit, Pending Approvals
- Sales dashboard: Assigned Leads, Follow-Ups Due, Sales Closed, Commission Earned
- GPS/Operations dashboard: Employees Online/Offline, Active Routes, Visits Today
- HR dashboard: Leave Requests Pending, Expiring Documents, Asset Status
- Finance dashboard: Revenue vs Budget, Expense Breakdown, Commission Liability, Payroll Status

Notifications

- In-app, email, and optional SMS/WhatsApp notifications
- Notifications for approvals, assignments, document expiry, geofence violations, and task due dates
- Real-time push notifications on mobile app

Audit & Security

- 2FA enforcement for Admin and Finance roles
- Immutable audit log: all create/update/delete/approve actions with timestamps
- TLS 1.2+ in transit; AES-256 at rest for sensitive data
- Session auto-logout after 30 minutes of inactivity; single active session option
- Country-wise data isolation; cross-country access only for Super Admin
- GDPR-compliant employee personal data handling

System Administration

- Master configuration for countries, brands, products, teams, and roles
- Exchange rate management with manual override option
- IP whitelisting option for admin access
- Password policy management (complexity, expiry for admin roles)

Manager Module

- Dedicated manager interface for team oversight and approval management
- Manager-level visibility into team sales, commissions, GPS, and leave requests
- Approval actions accessible from a unified manager dashboard

- Team performance summary with KPI tracking

Mobile Application

- GPS-based check-in/check-out with selfie verification (optional)
- Lead management: view, create, and update leads; log calls and meetings
- Customer visit logging with GPS proof, photos, and notes
- Expense submission with receipt photo capture
- Leave request, balance viewing, and approval status tracking
- Task management: view, update, and receive reminders on assigned tasks

Multi-Currency Support

- Configurable base currency per country with support for multiple transaction currencies
- Sales, expenses, commissions, and payroll in applicable local currency
- Configurable exchange rates managed by Finance/Admin with manual override
- Reports show amounts in both local and base currency for cross-country comparison

3. Investment & Pricing

The project will be executed in three structured phases, allowing The Marketing Quotient to go live with core sales and operations functionality first, then progressively add HR, finance, and advanced capabilities. We are commencing immediately with Phase 1.

Phase 1 — Sales & Operations Core			
#	Module	Days	Notes
1	User & Access Management	7	
2	Sales Management	8	
3	Building / Product / Task Management	12	
4	Manager Module	13	
5	Commission & Incentives	10	
6	GPS Tracking	15	<i>Includes 12 dev days + 3 buffer days</i>
Phase 1 Total		65 Days	

Phase 2 — HR, Payroll & Finance			
#	Module	Days	Notes
1	HR Management	10	
2	Employee Management	5	
3	Payroll	10	
4	Workflow Automation	10	
5	Finance & Revenue	5	

Phase 2 — HR, Payroll & Finance			
#	Module	Days	Notes
6	Reports & Analytics	5	
7	Notifications	5	
8	Expense Management	7	
Phase 2 Total		57 Days	

Phase 3 — Mobile, Security & Administration			
#	Module	Days	Notes
1	Multi-Currency Support	5	
2	Mobile Application	23	
3	System Administration	7	
4	Audit & Security	10	
5	Dashboards	3	
Phase 3 Total		48 Days	

Total Working Days (All Phases)	170 Days
---------------------------------	----------

3.1 Phase-Wise Pricing

Phase	Scope	Days	Amount (₹)
1	Sales & Operations Core	65	₹1,62,500
2	HR, Payroll & Finance	57	₹1,42,500
3	Mobile, Security & Administration	48	₹1,20,000
Total Development Cost (All Phases)			₹4,25,000

3.2 Phase1 Cost Summary

Description	Value
Total Development Cost (65 Working Days)	₹1,62,500
Total Project Timeline	2.9 Months
UI/UX Design Cost	₹30,000
Grand Total (Development + UI/UX)	₹1,92,500

Note: The above proposal is based on assumptions regarding the discussions and resources available at the time of preparation. The final project cost and timeline may vary subject to detailed requirements gathering, scope changes, third-party integrations, and resource availability confirmed during the project kickoff phase.

4. Terms & Conditions

Annual Maintenance (AMC)	20% of the total project cost, billed annually post-delivery. Includes priority bug fixes, security updates, and call support.
Timeline	Delivery depends on timely client feedback, approvals, and third-party dependencies. Delays in communication may impact timelines.
Third-Party Costs	Any external expenses such as domain, hosting, payment gateways, SMS/WhatsApp credits, or app store fees are not included and will be invoiced separately.
Quotation Validity	The quoted pricing and scope are valid for 30 days from the date of issue.
Intellectual Property	All source code, designs, and technical assets remain the property of the developer until full and final payment is received. After settlement, full ownership is transferred to the client.
Scope Adherence	This proposal covers the exact functionalities outlined. Any additional features or revisions beyond the agreed scope will be estimated and approved separately before development.
Taxes	All costs mentioned exclude applicable taxes (GST/VAT etc). These will be added as per the prevailing government norms.
Multimedia & Creative	High-end photography, videography, and professional editing are outside this project's scope and will be quoted separately if required.

We look forward to partnering with you on this journey.
